

Prompt:

I am building a web application called “**Was It Worth It?**”. It is a reflection-based spending tracker for young adults and college students.

I want you to recreate a **bold, modern, high-contrast dark UI aesthetic** with strong visual hierarchy and decisive call-to-action styling.

Important constraints:

- Do NOT change the product structure.
 - Do NOT change navigation or flows.
 - Follow the exact screen structure described below.
 - Focus only on visual styling and interaction polish.
 - Keep layout consistent across screens.
 - Keep the information architecture unchanged.
-

Overall Visual Style

Design direction: Bold, modern, high-contrast dark mode.

Use:

- Background: very dark navy/charcoal (#0F172A or similar)
- Surface cards: slightly lighter dark (#1E293B)
- Primary text: white
- Accent color: vivid pink or magenta (#F43F5E)
- Success color: bright green (#22C55E)
- Warning color: yellow (#FACC15)

Typography:

- Clean sans-serif
- Large, bold headers
- Strong weight contrast
- Uppercase styling for primary buttons

Buttons:

- Primary buttons: solid accent color
- Secondary buttons: outlined or alternate accent
- Status indicators: pill-shaped badges with strong color contrast

Spacing:

- Moderate density (not minimal)
 - Strong separation between cards
 - Clear visual grouping
-

Screens (Do Not Modify Structure)

1. Dashboard

- Top navigation: Dashboard, Log, Past, Insights, Profile
- Card showing: “1 Purchase Ready for Reflection”
- Purchase name and amount displayed
- Primary button: REFLECT
- Secondary button: + LOG NEW PURCHASE

2. Past Purchases

- Search bar
- Filter button
- List of purchases
- Each row shows: name, amount, status (Waiting or Reflected)
- View button on right
- Status shown as colored badge (Waiting = yellow, Reflected = green)

3. Log New Purchase

- Form with fields:
 - Name
 - Category (dropdown)
 - Date
 - Status
- Primary button: SAVE PURCHASE

4. Purchase Detail

- Display:
 - Name
 - Category
 - Date
 - Status
- Save button

5. Complete Reflection

- Heading: Reflect on [Purchase Name] (\$Amount)

- Three selectable options:
 - NOT WORTH IT
 - WORTH IT
 - UNCERTAIN
- Comments field
- Primary button: SUBMIT REFLECTION

6. Confirmation Screen

- Large success state with green check icon
- Text: Reflection Saved
- Display rating and comment
- Button: Back to Past Purchases

7. Spending Patterns

- Section: Category Insights
- Show percentage worth it per category
- Simple bar and line charts using accent colors
- Keep charts minimal but bold

8. Profile

- Reflection Window dropdown (e.g., 14 Days)
- Toggle switches for:
 - Email Reminder
 - In-App Reminder

Interaction Guidance

- Hover states should slightly brighten buttons.
 - Selected reflection option should visibly fill with color.
 - Badges should be clearly readable.
 - Maintain strong contrast for accessibility.
 - Keep the tone decisive and action-oriented.
-

Do not add:

- Bank integrations
- Budgeting tools
- AI predictions
- Extra analytics

- New screens

Only implement the existing product with this bold dark aesthetic.
